

OPTiGO CONNECT™

The only Networking Platform designed exclusively for Intelligent Buildings

The simplest, easiest, and fastest way to connect IP & IoT Devices in your building... while minimizing TCO and not sacrificing any functionality.

Key Benefits of Optigo Connect™

COST

Efficient layouts save 90% on cable and installation, with 50% savings in TCO.

REACH

Up to 5 miles in any direction.

RELIABILITY

Optical technology proven worldwide with Innovative redundancy system.

SIMPLICITY

Plug'n'Play operation with intuitive Graphical Interface.

SECURITY

Lock down your network with One-Click Secure & use anomaly detection.

Optimal Deployment Examples

TORRE DIANA, MEXICO

- High-Rise Office
- 320 IP Cameras
- Access Control HVAC
- Lighting Elevator Comm

ASTER GREEN, DENVER

- 320 Residential units
- 24 low-rise buildings
- 40 HD IP Cameras
- 60 FOB Access control

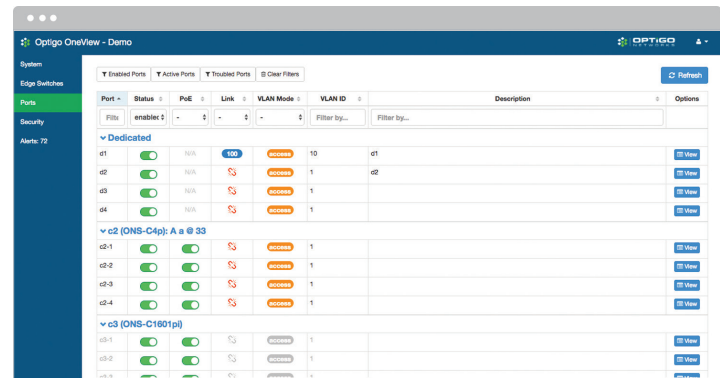

SHORT PUMP CENTER, RICHMOND VA

- Indoor /Outdoor Shopping Center
- 80 IP Cameras
- WiFi Backhaul

Optigo Connect™ provides maximum cost savings relative to traditional networking in large building or campus environments where long distance links are required.

OPTIGO ONEVIEW™

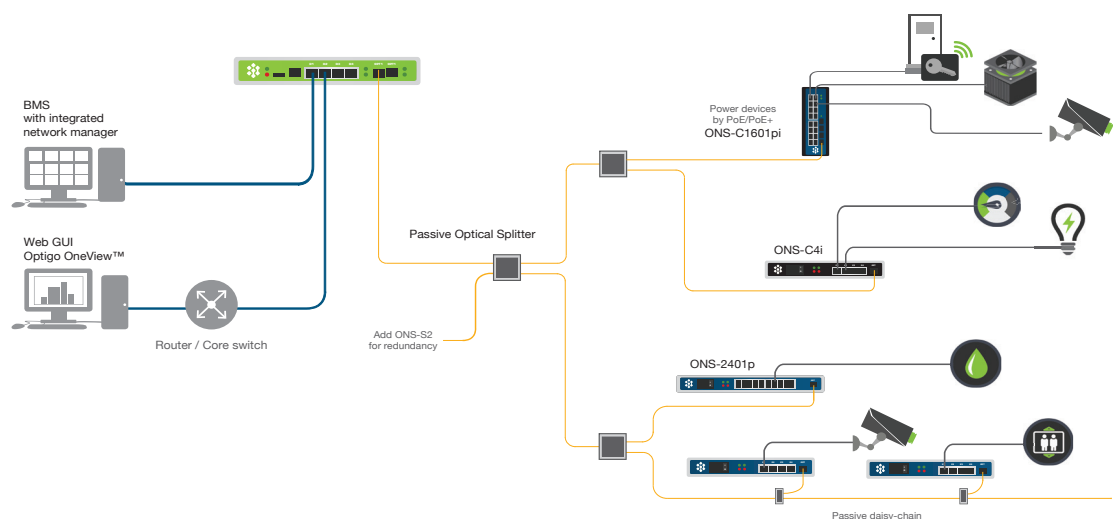

View & Manage your entire Optigo Network as a single virtual switch with up to 1028 distributed ports. Our web interface makes it easy to see which ports are active and what is plugged into them. Centrally disable unused ports to prevent unauthorized connections.

Key Benefits of OneView™

- Check detailed traffic information for any given port, or reset a PoE device anywhere in the network.
- HTIP-based interface hosted directly on device - No HW or SW Required!
- Assign VLAN settings for the entire network from one interface. Configuration is automatically pushed to all nodes.
